

erento

Business Intelligence Analyst (m/f)

Berlin, Germany - Full-time Internship

COMPANY DESCRIPTION

Erento is Europe's largest online rental marketplace and we're currently going through an exciting change process (<http://news.erento.com/projectphoenix>). We're redesigning and relaunching Erento as a modern, user-centric website which combines the best technology with the best user-experience. We want to change the face of sharing economy throughout Europe.

We're an enthusiastic, multicultural and ambitious team of 50 people. We pride ourselves on dynamism and modern working culture, and believe in giving real responsibility and opportunities to grow from day one. Our office is located in Kreuzberg, the heart of Berlin, Europe's hotspot for creativity and innovation.

Department

At erento, we want to make all decisions data driven. As a part of the Business Intelligence team, you will use data to prepare and support business and product decisions across the company. Using your technical skills, business acumen and creativity, you will build tools to automate reporting and generate insight that will help management with key decisions. You will work together with all departments and take ownership for one or more of our exciting initiatives yourself. This is an once-in-a-lifetime opportunity to participate in an exciting change environment within a digital business - and a highly competitive, paid internship.

Previous experience working in a “big data” analytics environment, with emphasis on providing business intelligence and data driven insight through statistics and reporting, will have you well equipped for this role.

We are recruiting the position as a temporary internship with a minimum commitment of 6 months. Internship will lead to a full-time position if you perform well.

Job Tasks Definition

- Work closely with management to understand their information needs and ensure BI strategy and solutions are an excellent fit to their evolving needs
- Work with databases, investigate trends, perform insightful analysis and contribute to executive decision-making as well as strategy of Erento
